EDUCATIONAL  
COIN-OP GAME!

# HARD HAT

## Put On An.... **Eddy** HARDHAT™ And Build Your Fortune!

**E**ddy's HARDHAT™ is a unique logic game with an educational puzzle to solve. A busy carpenter is chased by hammers and whirleds through a grid of scaffolding. Where he goes, segments of the support are knocked down. When all the scaffolding on one edge of the screen is eliminated, the structure "collapses" or scrolls to fill in that space. When all five letters (E, X, I, D, and Y) are in their respective places, a new game screen is awarded. For the second level, the player must place the letters H, A, R, D, H, A, and T.

HARDHAT™ has one player control, a reliable four-way joystick. Operator options include coinage, number of turns, extra turn for selectable points, and more. Eddy's HARDHAT™ will protect and increase your profits! Contact your Eddy Distributor today!
